Most popular web frameworks among developers worldwide 2021

Published by Lionel Sujay Vailshery, Feb 23, 2022

React.js overtook jQuery to become the most used web framework among software developers worldwide, as of 2021. According to the survey, 40.14 percent of respondents reported to be using React.js, while 34.43 percent were using jQuery.

Web framework

A web framework, or what may sometimes be referred to as a web application framework is a software framework that supports the overall software development of web applications. Web frameworks are utilized to automate menial activities typically performed within web development. In other words, it simplifies the web development process and, therefore, makes it easier to build a website.

Most used web frameworks among developers worldwide, as of 2021
