**n** npm Docs

Creating an organization

Any npm user can create an organization to manage contributor access to packages governed by the organization.

> **Note:** You need an npm user account to create an organization. To create a user account, visit the [account signup page](#)".

1. [Log in](#) to npm with your user account.

Login

Username

Password　　　　　　　　　　　[Forgot password?](#)

Login

Create Account

2. In the upper right corner of the page, click your profile picture, then click **Add an Organization**.

Search

👤 **kiera**

👤 Profile

🐾 Packages

⚙ Account

▭ Billing Info

▤ Access Tokens

➕ **Add Organization**

➡ Sign Out

3. On the organization creation page, in the **Name** field, type a name for your organization. Your organization name will also be your organization scope.

Create a New Organization

Name   https://npmjs.com/org/

Choose wisely, this cannot be changed.

4. Under the **Name** field, choose either the "Unlimited private packages" paid plan or the "Unlimited public packages" free plan and click **Buy** or **Create**.

Unlimited private packages

$7 per month   Buy
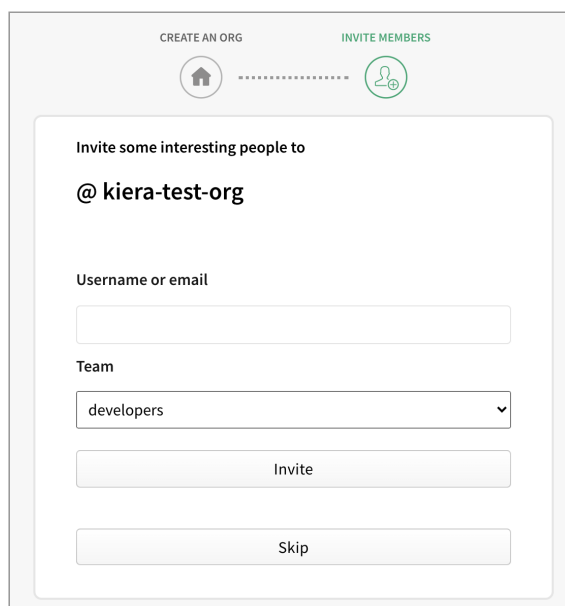

Unlimited public packages

Free   Create

5. (Optional) On the organization invitation page, type the npm username or email address of a person you would like to add to your organization as a member and select a team to invite them to, then click **Invite**.
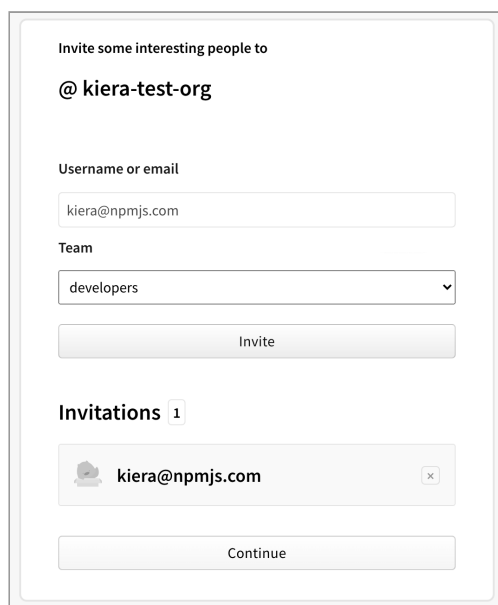

6. Click **Continue**.
